- Robotic assisted surgery (with *da Vinci* surgical system).
- Urogynecology and pelvic reconstructive surgery.

## RESEARCHS & INVENTIONS

2013            **Invention:** “DEVICE FOR ELECTRONIC PELVIC ORGAN PROLAPSE QUANTIFICATION SYSTEM”;  
 Pending for FDA approval.  
 Patented with the United States Patent and Trademark office patent  
 Number # US20130274588 A1

2011            **Invention:** “METHOD FOR ELECTRONIC PELVIC ORGAN PROLAPSE QUANTIFICATION”;  
  
 Patented with the United States Patent and Trademark office  
 Number # US20110077500 A1

2006-            **Resident Research:** *Dept. of Obstetrics and Gynecology*, Cleveland  
 2007            Clinic Foundation, Cleveland, OH.  
 Prospective study comparing outcomes after hysterectomy vs.  
 laparoscopic ablation for patients with pelvic pain and stage-matched  
 endometriosis. *Research mentor:* Tommaso Falcone, M.D.

- 2001-2002      **Voluntary Research activity:** *Dept. of Obstetrics and Gynecology, UCLA.* Investigated the role of nitric oxide on the induction of apoptosis in breast cancer cell lines. Gained familiarity with a variety of molecular biology techniques, including cell culture, PCR, western blot, gel electrophoresis, and northern blot. *Principal Investigator:* G.Chaudhuri, M.D., Ph.D.
- 1996-1997      **Medical School Research activity:** *Dept. of Infectious Disease, Shahid Beheshti University, Iran.* The comparison of Cephtriaxone and Penicillin for the treatment of bacterial meningitis at Labafinejad Hospital. *Research mentor:* M.Alimaghani, M.D.
